

- **As a player, I want to start the game so that I can fly a drone to sneak in enemy facilities. [Epic]**
- **As a player, I want to assign another key to a function so that I can make the control more comfortable for me.**
  - **Given** that I haven't seen my current key that assigned to the function **when** I see the main menu **then** I must see an option which can show my key configuration.
  - **Given** that I haven't changed my configuration **when** I was taken to the configuration page **then** I expect to see a way to choose one of the functions and change its key assignment.
- **As a player, I want to move my drone so that I can head for my goal. [Epic]**
  - **As a player, I want to move my drone horizontally so that I can go to different rooms.**
  - **As a player, I want to move my drone vertically so that I can go to higher or lower places.**
  - **As a player, I want to tilt my drone so that I can pass through some narrow spaces.**
- **As a player, I want to take a picture of a whiteboard with secret information on it so that I can get that information. [Epic]**
  - **As a player, I want to know the location of the whiteboard so that I can head for it. [Epic]**
  - **As a player, I want to open the camera on the drone so that I can take the picture.**
- **As a player, I want to save the game so that I won't lose my progress when I exit the game. [Epic]**
